**Subject: Comment for Delta ISB Meeting, Agenda Item 4**

Honorable Board Members,

I write to support the comments made on the Draft Scientific Basis Report by the Shingle Springs Band of Miwok Indians, Winnemem Wintu Tribe, Little Manila Rising, Restore the Delta, and Save California Salmon. These groups live along, and depend on the rivers that are the subject of this report. For some, their ancestors have had a relationship with those rivers from time immemorial, and their physical and spiritual lives have been enmeshed with those of the salmon, the frogs, the grasses, the trees and the other living beings that live in and by the rivers.

These groups have had no say in the development of this Draft Scientific Basis Report, and have voiced their objection to it. In the name of justice, and just plain common sense, I urge you to listen to them.

Thank you.
