Subject: DMDU Prospectus Comments

Hello,

Thank you for the opportunity to review the DMDU draft prospectus.

At this time, my primary comment is a suggestion that the DISB consider and review post-normal science as a decision-making and problem-solving strategy that is highly applicable to the Delta context. Post-normal science confronts uncertainty by considering multiple values and a plurality of legitimate perspectives.

I also urge the DISB to explore the literature on just transitions and consider what former ISB member Dick Norgaard referred to as the "impractical changes" - "those well beyond existing practice" that are called for by our present cantankerously complex conjuncture.

Best regards,

Alejo Kraus-Polk *He, ki*
