

The Delta Transformed, Loss of Food Supplies to Consumers, and Potential for Recovery

August 24, 2021 at 12:00 - 1:00 PM PDT
Webinar

Dr. James Cloern, Dr. Letitia Grenier, and Dr. Stephen Andrews will discuss a recently published study that uses measures of landscape change to estimate how much has been lost from the primary productivity that supports aquatic food webs in the Sacramento-San Joaquin Delta. They also consider the potential for recovery of those lost functions, and present a simple approach for modeling the outcomes of different restoration scenarios. The open access study is available at <https://doi.org/10.1016/j.scitotenv.2021.147097>.

Dr. James Cloern

Emeritus Scientist
U.S. Geological Survey

Dr. Letitia Grenier

Resilient Landscapes
Program Director
San Francisco Estuary Institute

Dr. Stephen W. Andrews

Sr. Water Resource Specialist
Resource Management
Associates

Brown Bag Seminars are free and open to the public with registration:
