

SFEWS Associate Editors, 2015–2016

SFEWS Associate Editors actively participate with the Editor-in-Chief and the Managing Editor. They coordinate and perform peer reviews, suggest topical specialists for peer review, encourage submission of high-quality manuscripts, and advise on management and content. Reviewers take routine steps to avoid redundant publication and screen for plagiarism or other possible misconduct through standard means as guided by the [COPE Code of Conduct and Best Practice Guidelines for Journal Editors](#). We thank the following individuals for their contributions as Associate Editors of *SFEWS*.

William A. Bennett	University of California, Davis
Michael Connor	East Bay Dischargers Authority
Cliff Dahm	Emeritus, University of New Mexico
Michael Dettinger	U. S. Geological Survey
