

# Save the Date

October 26, 2016 9 am - 12 pm

## Low Intensity Chemical Dosing (LICD): Opportunities to Improve Delta Water Quality Leveraging Hybrid Coagulation / Wetland Treatment Systems

Join us at 980 Ninth Street 2<sup>nd</sup> floor, in Sacramento, CA as we showcase project results.

### Topics of discussion

- Carbon, nutrients, and mercury sequestration and transformations
- Water Quality Improvements
- Sediment accretion and characterization
- Ecosystem Considerations
- Design, cost and logistics

Registration for this free event will open end of September; details to follow.
