To the Bureaucrats and Water Fat Cats who are pushing for the Canal through the Delta and the tax wasting joke program the Delta Plan EIR:

It is time to come out of hiding and face the public on your idiotic plans to decimate the Calif. Delta by running a tunnel around the Delta to steal our water. Calif. is broke and we need the water in Northern Calif. for the fish, farming, birds and to keep the beautiful ecosystem that is the Calif Delta. Stop the madness and find ways to get more water from recycling and conservation. If you really believed that the canal was a good idea and that it would benefit the people who live, work and vacation in the Delta you would include representatives from all of those factors of at your meetings and back room scheme sessions!!!!

Stop pushing the canal down the throats of the people who live and farm in the most beautiful part of California.....the Sacramento San Joaquin Delta!!!!

Sincerely yours,

Clare M. Spensley--
