Subject: Delta Plan - Draft 3 - Central Valley Flood Protection Board preliminary comments

Good afternoon Terry and Joe,

The Central Valley Flood Protection Board is submitting the attached comments regarding Draft 3 of the Plan. The Board will have more detailed comments to submit after the Board meets on June 24. Thanks.

Len Marino

**Comments on Third Staff Draft Delta Plan
Dated April 22, 2011
Central Valley Flood Protection Board**

Chapter 7 – Reduce Risk to People, Property, and State Interests in the Delta

RR P3, page 89, lines 6 - 8

Encroachments located within project levees and project levee right-of-way need to be permitted through the Title 23 permitting process managed by the Central Valley Flood Protection Board. Maps included in Title 23, California Code of Regulations define project levee alignments.

Federal and State project levees within the Delta are illustrated on the following map links:

http://www.water.ca.gov/floodmgmt/lrafmo/fmb/docs/SanJoaquinRiver_LFPZ_Map.pdf
http://www.water.ca.gov/floodmgmt/lrafmo/fmb/docs/SacramentoRiver_LFPZ_Map.pdf

Page 90, after Line 39, insert fifth bullet:

- ◆ **USACE 1955/1957 Profile:** Levees built under the 1955/1957 profile incorporate a minimum crown elevation equal to the 1955/1957 original Corps design profiles resulting from modeling results listed in the Corps 2002 Comprehensive Study. There is no consistent level of protection associated with the 1957 profile other than the fact that the height of levees were designed using the 1955 flood of record.

Page 91, Table 7-1; Add another row to the table:

“Class 6; USACE 1955/1957 Profile” Levees within this class allow all land uses (therefore, a “checkmark” in each column). The Central Valley Flood Protection Board standards for levees are included in California Code of Regulations, Title 23 Waters, Division 1 Central Valley flood Protection Board.

RR R6, Page 95, insert sixth bullet:

- ◆ The Delta Levee Subvention Program shall be included as an investment tool used to fund maintenance activities on Delta levees.
