Subject: habitat restoration project in the Suisun Marsh

Dear Members of the Science Board of the Delta Stewardship Council,

I am a landowner in the Suisun Marsh area of the Sacramento-San Joaquin Delta. Together with the surrounding landowners, for the past four years, I have worked to conserve my land as a tidal marsh habitat. Attached to this email is the prospectus detailing the work. I invite you as members of the science board of the Delta Stewardship Council to review this prospectus and support my project as one way and possibly the best way of completing the task of habitat restoration in the Delta.

Thank you for your consideration,

Jeff Cavanaugh
