

(Received 05/12/2010 via email)

This project will put lives at risk via the sheriff's marine patrol, fire boats not being able to get through, and the environmental impact report is not yet in! And we won't even go into the cost for a state that cannot provide enough teachers for classrooms.

Are you people smoking crack or is it just the money that Resnick has paid Feinstein that is pushing this through?

We will vote out EVERY incumbent that signs on to this bill or ANY project that further endangers the Delta we all love!
