RE: Comments on Second Draft Interim Plan

On behalf of Ironhouse Sanitary District , I have reviewed the Second Draft Interim Plan and have the following comments.

1. Page 29 of the Second Draft Interim Plan references a "Map and Table of Current Levee System Integrity" and page 30 of the Second Draft Interim Plan states:

Based on this approach, two levee classifications have been identified – one for repairable levees (to be partially repaired after seismic damage before the next flood season and the other for robust levees, designed to survive the earthquake retaining an acceptable portion of their flood protection capability.

Where is the Map showing these two levee classifications?

2. Page 37 is a Land Use Map. Please confirm that the Land Use Classification for Jersey Island is "IA Intsv Ag/Infra."

Thank you for your attention to this e-mail.
