

## 2012 Postdoctoral Fellows

<b>P.I</b>	<b>Lead Institution</b>	<b>Funding</b>	<b>Topic</b>
Iryna Dronova	University of Berkeley, ESPM	\$161,709	Modeling three-decade change in wetland canopy leaf area index for ecosystem function and waterbird habitat assessments
Emma Gatti	Stanford University	\$163,063	A 3D geologic model for assessing liquefaction and related levee failure in the Delta
Emily Howe	University of Washington	\$169,376	Unraveling sources of organic matter support in the Delta's marsh ecosystems using fatty acid biomarkers and multiple stable isotopes
Brittany Kammerer	University of California, Davis	\$169,376	Defining salinity tolerance and physiological biomarkers in longfin and delta smelt

## 2012 Doctoral Students

<b>P.I.</b>	<b>Lead Institution</b>	<b>Funding</b>	<b>Topic</b>
Lisa Komoroske	University of California, Davis	\$102,875	Integrating physiological, genomic and environmental data to understand impacts of climate change on Delta smelt, <i>Hypomesus transpacificus</i>
Gavin McNicol	University of California, Berkeley	\$102,875	Controls on the Net Carbon Emissions from Restored Wetland Ecosystems
Matthew Young	University of California, Davis	\$96,472	Delta Littoral Food Webs: Structure and Function
