

## Estuarine Connectivity Symposium February 18, 2020 | UC Davis Conference Center

In estuarine systems, ecological connectivity is key. And in the face of a rapidly changing climate and sea level rise, it is more important than ever to understand and increase connectivity to strengthen ecosystem resilience and adaptation potential. Hosted by the Delta Stewardship Council, this symposium will engage diverse areas of expertise to explore the unique ecological and policy challenges to achieving connectivity in estuaries, specifically in the San Francisco Estuary.

This symposium is free and open to the public with registration.

**8:00 AM - 4:30 PM**

**#connectivitysymposium**
