

ADVANCING INTERDISCIPLINARY RESEARCH

This two-part event will build relationships between collaborative science groups and the [Bay-Delta Social Science Community of Practice](https://bit.ly/3DCSrWL) (bit.ly/3DCSrWL), create opportunities for interdisciplinary research, and communicate its value for decision-making.

TRAINING: October 14, 2022 | 10:00 AM - 12:00 PM PDT

This virtual training will provide fundamental background on disciplines and approaches to social-ecological challenges. It will highlight case studies presented by social scientists and is intended for all scientists, managers, and practitioners interested in integrating interdisciplinary approaches into their work. Attending the training is encouraged, but not required, to attend the workshop.

[Register to attend the training via Zoom](https://bit.ly/3ddG7EU) (bit.ly/3ddG7EU).

WORKSHOP: October 20, 2022 | 1:00 - 4:00 PM PDT

At this interactive virtual workshop, Community of Practice members will be paired with Delta collaborative science group members to co-develop mock proposals for interdisciplinary research projects that support the 2022-2026 [Science Action Agenda](https://bit.ly/3OuC19C) (bit.ly/3OuC19C). The workshop, followed by an optional in-person networking event, is designed for natural and social science researchers interested in the Delta.

[Register to attend the workshop via Zoom](https://bit.ly/3AfluAj) (bit.ly/3AfluAj).
