

# ADAPTIVE MANAGEMENT FORUM

May 4-5, 2023

#AMForum2023

In-person & Zoom attendance

CNRA Building (715 P Street,  
Sacramento, CA, 95814)

The Delta Science Program hosts the Adaptive Management Forum every two years to promote dialogue and information exchange related to adaptive management in the Sacramento-San Joaquin Delta.

**The 2023 Forum will have a thematic focus on governance for adaptive management**, with the aim of fostering learning and discussion around governance needs to support effective, equitable, and inclusive processes in the Delta.

Adaptive management provides a structured approach for adaptation in a context of rapid, often unprecedented, and unpredictable environmental change. Its success depends on support from the larger social, regulatory, and institutional context, or “governance system.”

**Watch for registration and an agenda to be released soon.**
